

La punta in metallo duro VariDrill è una punta versatile progettata per l'uso nelle operazioni di foratura multimateriale.

Il design della punta offre la soluzione definitiva per la foratura multimateriale

Runout ridotto sullo stelo

Design senza margini per distribuire uniformemente le forze di taglio per ridurre la formazione di truciolo sul tagliente

Qualità WU25PD per migliorare la resistenza all'usura

La punta in metallo duro VariDrill è una punta adatta a più materiali disponibile in un'ampia gamma di dimensioni da 1 a 20mm con passo da 0,1mm in 3 x D, 5 x D e 8 x D, con e senza canali del refrigerante.

**WU25PD**

**P M K N S**

Fornisce una finitura superficiale omogenea su diversi materiali:  
Acciaio, acciaio inossidabile, alluminio, ghisa e leghe resistenti al calore.

\* D1 < 20mm a norma DIN 6537K  
D1 > 20mm agli standard di fabbrica  
\*\* Agli standard di fabbrica

NOTA: Le punte in metallo duro WIDIA in lunghezza corta e normale sono conformi alla norma DIN 6537.  
Punte più lunghe sono conformi agli standard di fabbrica WIDIA.  
Anche le punte in metallo duro con diametro D1 > 20mm (non DIN 6537) sono conformi agli standard di fabbrica.

Tolleranze delle punte e fori

Le punte in metallo duro ad alte prestazioni con tolleranza m7 producono fori con tolleranza H9. La tolleranza H8 può essere raggiunta in condizioni particolarmente favorevoli. La punta deve essere utilizzata per fori con tolleranza H8 e in condizioni favorevoli è possibile ottenere una tolleranza H7. Le punte in metallo duro con tolleranza H7 producono fori con tolleranza K9-11. Altre tolleranze per la foratura richiedono speciali versioni di punte in metallo duro.

Tolleranze del diametro D1 su:  
Punta TDG con vani elicoidali
