REPRESENTED COMPANIES	10/11

FOR NINETY FIVE YEARS, BRUNETTI UTENSILERIA HAS BEEN A POINT OF REFERENCE FOR METALWORKING INDUSTRIES.

Thanks to its wide ready to use materials assortment in the warehouse, the company is able to provide a quick service to companies in all industrial and craft sectors in central and northern Italy. With a projected state of the art organization into the third millennium, Brunetti Utensileria is constantly committed to meeting the needs of the industries in our area, maintaining its reputation for reliability and quality over time.

The story of Brunetti Utensileria began back in 1929, when Enrico Brunetti opened a small shop in Bologna. After the devastation of the war, the company moved to a new location within the same city and began to supply important engineering companies in different regions of central and northern Italy. In 1971 Enrico's son, Cesare, felt the need to move the company to a more modern area of Bologna in order to encourage its growth.

However, he soon realizes that there is not enough space to support the company's ambitions. So in 1983, Brunetti Utensileria moved to Centergross, an area where space and logistics of goods were not a problem. The workshop (as Cesare jokingly calls it) carries out its tasks in a 2000 square meter warehouse. And it is here that Brunetti company will be able to achieve its successful goals.

A affresco inside the warehouse, imagines a futuristic Bologna, with new towers and spaceships that symbolize the tools and accessories provided by the company. On one of these spaceships, their grandmother, there are the seven grandchildren, representing the continuity and future success of the company.

Through the generations, Brunetti Utensileria has shown to adapt itself and thrive, anticipating the needs of the sector and providing a quality service to the metalworking industries of Emilia-Romagna, Lombardy, Marche, Tuscany and Umbria. The commitment to innovation and excellence has made Brunetti Utensileria a point of reference in the industrial landscape, ready to successfully face the challenges of the third millennium.

1929

## THE FOUNDATION

Enrico Brunetti opens a small shop in the historic center of Bologna. After the war he moved and from that moment the company has grown in importance and began to serve the best companies in Emilia-Romagna.

1971

## THE TRANSFER AND GROWTH OF THE COMPANY

His son Cesare moved the company to Via Stalingrado, but the shop of about 600 square meters was not large enough for the evolution of the company.

1983

## THE MOVE TO CENTERGROSS

The company moves to Centergross where there is no shortage of space, and the Brunetti family foresees a long future for the company.

2024

## THE 95<sup>TH</sup> ANNIVERSARY

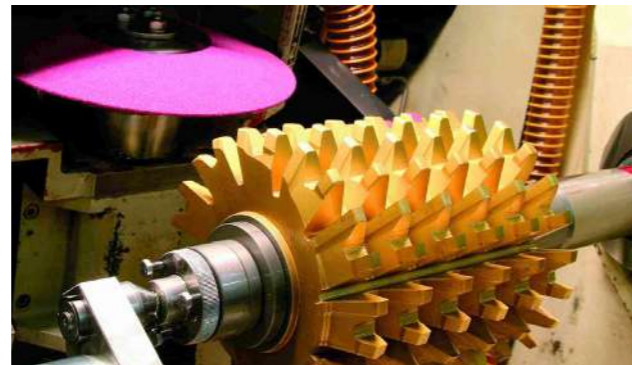

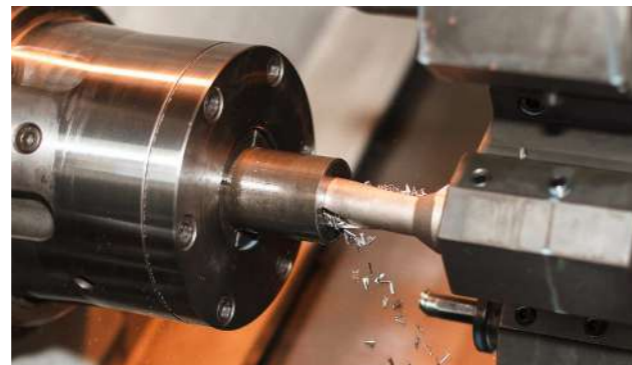

Here is this new anniversary, which finds us particularly occupied in the distribution of new abrasive and lubricant products, offering more and more technology in precision mechanics and chip removal.

*We are enthusiastically and confidently aiming towards the coveted goal of the century.*

*For nearly a century, Brunetti Utensileria has been supplying many of the most important metalworking and engineering industries in Emilia Romagna, Lombardia, Marche, Toscana, and Umbria.*

*In 1929, in a small shop in the historic center of Bologna, Enrico Brunetti started the family business, which is managed today by his son Cesare and his grandson Enrico. In 1971, to keep pace with the times, the company moved to Via Stalingrado in the trade fair area and, subsequently, to support its continuous expansion, inside the Centergross in Funo di Argelato, occupying an area of 2,000 square meters.*

*The vast assortment of ready-to-ship stock in the warehouse allows Brunetti Utensileria to quickly serve companies across all industrial and artisan sectors in Central and Northern Italy, projecting the entire organization into the third millennium.*
